PROFILE

Java developer who finds satisfaction in creating effective solutions for our clients. I value carrying out my work professionally and enjoy collaborating with the team to find effective and efficient solutions. I work well independently and proactively take initiative to conduct further research when needed. I am always looking for ways to automate and improve the processes around our work. I enjoy sharing my knowledge with the team and am also eager to learn from others. Driven, eager to learn, and customer-oriented.

WORK EXPERIENCE

Java developer

2025 - PRESENT

Caseware

- Within the company, I transitioned to a new team where development is done in a monorepo and microservices are built on an AWS Kubernetes platform. In this team, I develop software using Spring Boot.
- Helping with CDT and DSS project.

Java developer

2022 - 2025

Caseware international

- Lead Developer for AuditCase. Responsible for modernizing the Java codebase through extensive refactoring and promoting the use of SOLID design principles.
- Interim Product Owner for the CDT product, responsible for ensuring technical quality and supporting the team in product development.
- Working on DSS, DSS is a solution for integrating with various document signing platforms.
- Mentoring junior and mid-level developers.
- In addition, involved in AWS administration activities and designing a new API using API-first principles and OAS (OpenAPI Specification).

Full stack developer

2017 - 2022

Caseware Netherlands

- Development of the AuditCase product, as well as work on CDT, CDT is a solution for interacting with the Chamber of Commerce, banks, and the tax authority, while actively monitoring their statuses.
- Team Lead of the AuditCase team and ambassador for knowledge sharing through presentations, code reviews, and pair programming.
- Mentoring junior and mid-level developers.
- Major front-end refactor from Dojo to Vue and phasing out of XPages of the AuditCase product.

PERSONAL INTERESTS

- Cycling
- Swimming
- Walking
- Photography
- Vegetarian

WORK EXPERIENCE

IBM domino developer 2002 - 2017
ChangeToComm

- Development work on AuditCase, a DMS and CRM system for accounting firms. During this period, the application was transformed from a desktop application to a web-based application.
- Around 2014, we migrated the entire codebase to Java.

IBM lotus domino developer 2001 - 2002
MyWay Solutions b.v., ITnova

- Development of a web application for creating advertisements for Mercedes dealers.

IBM lotus domino developer 1998 - 2001
IDconnect BV, Spherion

- Graduated with a thesis on knowledge management.
- Joined the company after graduation and worked on assignment as an IBM Domino specialist, including at Postbank in Leeuwarden.

Internships 1998
Akzo Nobel, Nederlands dagblad

- Internship assignment of several months at Akzo Nobel in Arnhem. Conducted a package selection process for security products to protect data on laptops.
- Internship assignment of several months at Nederlands Dagblad, where we determined the desired management information to optimize the management information system.

EDUCATION

Courses 1999 - PRESENT
Continually followed courses to expand my skillset, tailored to the tasks at hand.
